MARION, CRITTENDEN COUNTY, KENTUCKY, September 8, 1910

NUMBER 12

OUR TOAACCO TID- INGS

Plan a Whirlwind Campaign—Mr. Elliott, of Henderson Present at Meeting.

The County Committee of the Henderson Stemming District Association held an important meeting at the court house Saturday.

The committee passed a resolution requiring all district committeemen to make a whirlwind campaign this week for the purpose of getting as much of the present crop of tobacco pooled as they possibly can.

The pool cannot be effected unless 85 per cent. of the crop is secured, and this must be accomplished before the district meeting is held at Henderson on September the third.

Mr. William Elliott, of Henderson, manager of the organization, was present at the meeting. The meeting was presided over by Mr. F. F. Brown, chairman of the committee. Mr. W. H. Parker the chairman-elect, will assume his duties on Sept. 3.

At the meeting referred to above the Hopkins County Board recommended that the District Board insert a new clause in all future contracts of sale. Commenting on the resolution, the Madisonville Journal says:

TO THE FARMERS

We call attention to the resolution adopted by the county committee of the Stemming District Association here last Saturday, recommending a new clause to be put in all sale contracts made with purchasers of the 1910 crop of pooled tobacco. This resolution is published in this issue and should be carefully read by tobacco growers. Under its terms the purchasers of pooled tobacco cannot purchase any tobacco out of the pool at a greater price than that paid for the pooled tobacco without increasing the price on all like grades in their purchase from the Association.

The resolution does not in so many words state this, but in its ingenious words are given effect such will be the result. It is well known that the strongest tobacco buyers of our type of tobacco have been dealing with the association each year since its organization and will most likely continue to do so as their relationship has been very pleasant and apparently satisfactory.

Whatever we may say or think about the Stemming District Association or the pooling business, one thing is certain—the management of the Association understands how to handle the tobacco of this district to please the buyers who deal in it. If they continue to buy from the Association with this new contract they will not likely buy outside tobacco except at a reduced price, or at most they will be careful not to increase the pool price.

The resolution in full follows: Be it resolved by the Hopkins County Executive Committee of the Stemming District Tobacco Association, That we request the District Executive Committee to have a clause in the contract for the sale of any and all of the 1910 crop of tobacco pooled with said Association stipulating in substance as follows: "It is understood and agreed and the

prices herein named for the tobacco sold and purchased under this contract are fixed and agreed to upon the condition that if the condition of the market for tobacco shall be so changed as to convince the purchasers under this contract that they can afford to pay a greater price for tobacco of any grade named and purchased in this contract, they agree to pay back such increase price to the Stemming District Tobacco Association for the tobacco of such grade named herein. If the person named in the sale contract shall, directly or indirectly, purchase of any other association, corporation or person any tobacco of any grade or grades named herein within the territory known as the Stemming District within six months after this date, for a greater price than herein named for the same grade or quality, it shall be conclusive evidence that the price of tobacco in the market has so increased and the purchaser herein named agrees to

pay the Stemming District Tobacco Association such increase price for all similar grades herein named."

THE HUSTLER'S COMMENT
The Hustler, commenting on the above resolution, says:

"The resolution, if adopted by the District Board, will put a new and rather interesting phase on the tobacco problem." Continuing the Hustler comments as follows:

"We believe the purchasers will not object seriously to this clause because it is reasonable.

"Whether the change in the market price of tobacco within the six months shall justify him in paying increase price is a matter left to his discretion.

"The contract is legal, we believe for the reason it in no way restricts trade. No one can deny that the Association has the right to reserve to itself any increase of price the market may justify within a period of time. Certainly it cannot be against public policy, either, for the Association to trust the matter of increase to the discretion of the buyer. The Association is satisfied evidently that the buyer can definitely settle the question of increase price in favor of the Association by directly or indirectly purchasing tobacco of the same grade or quality of any other person, association or corporation within the district at an increased price. This, we suppose, is the meat in the cocoanut though we have no right, probably, to give stress to one portion of the clause over another; but it certainly puts a stop to the purchasers under this contract buying the same grades of tobacco in this district at any greater price than that paid the association.

It is said, likely, that the purchaser of several million pounds of tobacco from the Association will be so anxious to purchase more tobacco that he will give an increased price to any person out of the pool for even one pound when it will raise the price on that grade for the entire amount purchased of the Association. He may purchase of those who are out of the pool, but he will likely be very particular that he does not give any greater price than that paid the Association. Where the penalty is so great it is quite likely the purchaser will want no question about this and see to it that there is no room for dispute by making his prices to non-poolers certainly low enough. When we come to consider this tobacco business, would it not be best that every tobacco grower should pool his crop and join his neighbor in this effort to hold up prices and protect the weak as well as the strong farmer?"

T. C. PRESIDENT DE- NEWSY WASHINGTON NIES I. C. MERGER

Preparation for Through Run by
Mail Clerk Gives Rumor
Color, However.

Hopkinsville, Ky., Sept. 1.—While here on his way to Princeton in his private car, President A. B. Newell of the Tennessee Central railroad, denied the persistent rumors that his road would be taken over by the Illinois Central on Sept. 15.

"I heard the report before leaving Nashville, but there is absolutely nothing to it. We are doing excellently as an independent line. Our relations with the Illinois Central are entirely friendly and on a basis that is mutually satisfactory."

It is known that mail clerks on the Illinois Central and Tennessee Central have been instructed to post themselves at once so as to be qualified for making through runs from Evansville, Ind., to Nashville, Tenn. This fact together with the presence of a corps of railroad engineers, who are making surveys along the I. C. and T. C. lines in this region, lends color to the rumor that changes are to be made speedily in the operation of the roads. There is also a report that that T. C. is trying to lease the I. C. branch from this city to Princeton. President Newell and a number of T. C. officials left here for the latter city.

FOR SALE

A seven room house in good repair in convenient location, two squares from the court house. A large yard, horse lot, garden and large vacant corner lot. House newly painted, has large hall, three big porches with both well and splendid cemented cistern on porch near kitchen. New iron fence around yard, cement walks, large stable. Will sell cheap. See Mrs. Hadley Long at her residence near the jail.

Mrs. HADLEY LONG.
Marion, Ky.

Removal Notice.

I have removed my stock of Dry Goods, etc., to the new Rice building, near the depot. The public is cordially invited to meet me at the new place. Thanking one and all for past favors and soliciting a continuance of your patronage, I am

Sincerely Yours,
C. B. Loyd,
Fredonia, Ky.

EDWARD D. STONE GOES TO LAW SCHOOL

Edward D. Stone, a deserving young student and teacher of Crittenden county left Saturday for Lebanon, Tenn., to enter the noted Law School of the Cumberland University. He is a model young man and we wish him success in his effort to master the honorable profession of the law. He will get the news from his old county through the Record-Press.

I. G. RAILROAD REVISES SUNDAY RATE

Commencing Sunday Sept. 11, 1910 round trip tickets will be sold for one fare, plus 25 cents, minimum 50 cents,

LETTER.

Congressmen Named Who Will
in all Possibility, not be Sent
Back After this Term.

Washington, D. C., August (Special)—The mutations of politics is eliminating veterans of the House of Representatives to a most unusual degree. In the nominations made up to this date, about half the 391 districts now having candidates, it appears that the following members of the House who have served more than one turn, will not, by reason of voluntary retirement or failure to be renominated, be members of the next House. The number of terms served and important committee connections are given.

Republicans—Duncan McKinlay, second California; 3 terms; Elections, Indian affairs and Merchant Marine and Fisheries. James McLauchlan, seventh California; six terms; Rivers and Harbors, War claims. Charles F. Scott, second Kansas; five terms; Chairman Committee on Agriculture.

William A. Calderhead, seventh Kansas; six terms; Invalid Pensions, Ways and Means. William A. Reeder, sixth Kansas; six terms; Chairman Irrigation of Arid Lands, Improvement Mississippi Levees.

J. M. Miller, fourth Kansas; six terms; Chairman Elections No. 2; Interstate and Foreign Commerce.

Amos L. Allen, first Maine; six terms; Indian affairs, Labor, Reform in the Civil Service.

A. J. Gronna, North Dakota; three terms; Public Lands.

William P. Hubbard, first West Virginia; two terms; Interstate and Foreign Commerce.

Nehemiah D. Sperry, second Connecticut; eight terms; Chairman Alcoholic Liquor Traffic; Post Offices and Post Roads.

A. F. Dawson, second Iowa; three terms; Accounts, Naval Affairs.

J. A. T. Hull, seventh Iowa; ten terms; Chairman Military Affairs.

Henry W. Palmer, eleventh Pennsylvania; four terms; Revision of the Law.

John M. Reynolds, nineteenth Pennsylvania; three terms; Public Lands, Territories.

Charles F. Barclay, twenty-first Pennsylvania; two terms. Census, Indian Affairs.

George F. Huff, twenty-second Pennsylvania; five terms; Chairman Mines and Mining; Post Offices and Post Roads.

Allen F. Cooper, twenty-third Pennsylvania; four terms; Chairman Printing; Foreign Affairs.

Democrats—L. F. Livingston, Fifth Georgia; ten terms; Appropriations.

Harry Maynard, second Virginia; five terms; Industrial Arts and Expositions.

James L. Rhineock, sixth Kentucky; three terms; Industrial Arts and Expositions.

Eaton J. Bowers, sixth Mississippi; four terms; Appropriations.

William B. Craig, fourth Alabama; two terms; Public Lands.

Robert M. Wallace, seventh Arkansas; four terms; Coinage, Weights and Measures; Private Land Claims.

Charles C. Reid, fifth Arkansas; five terms; Judiciary.

Charles R. Thomas, third North Carolina; three terms; never would learn otherwise.

Library: Public Buildings and Grounds.

Thos. D. Nichols, tenth Pennsylvania; two terms; Labor.

Oscar Gillespie, twelfth Texas; four terms; Election of President, Vice President and Representatives in Congress.

SAFETY AT HOME

According to Dr. Woodward, health officer for the national capital, people are safer from such diseases as typhoid fever at their homes, where ordinary sanitary precautions are enforced than they are at the average summer resort. He says people go to the seashore, the mountains or other places with the intention of getting pure air, milk and healthful food. They do not take into consideration the sanitary conditions under which the will is handled and disregard other conditions for health preservation.

"Our inspectors make careful inquiry into every case of typhoid fever," said the doctor today, "and go carefully into the history of the patient. Persons take their lives into their hands when they visit a resort without knowing anything of the conditions existing there as to sanitation.

It can be conservatively estimated that 20 per cent of the typhoid fever cases prevailing in the District of Columbia at this time of the year are brought back to the city after a vacation spent at some summer resort.

THE MARION GRADED SCHOOL

Opened Monday Under Flattering
Conditions—the Large Chapel
Crowded By Patrons.

The Marion Graded School was opened Monday morning under the most flattering conditions and with the best enrollment in many years and with the large chapel crowded with patrons to the doors a great number of whom were compelled to stand during the exercises.

After an appropriate song by the High school, Rev. M. E. Miller was called on to lead the devotional exercises, after which the pupils and patrons were treated to short talks from Hon. Jno. W. Blue, Hon. A. C. Moore, Judge Walter A. Blackburn, now of Paducah, Rev. J. F. Price, Judge Carl Henderson, Mayor C. E. Weldon, H. A. Haynes, C. S. Nunn and W. B. Yandell, the last speaker being the honored school D.

NATIONAL RIVERS AND HARBORS CONVENTION

The coming convention of the National Rivers and Harbors Congress which will be held in the city of Washington the week of December 5th, promises to be the largest gathering of water enthusiasts ever held in this or any other country.

With President Taft sounding the keynote for a comprehensive policy on the part of the Federal Government towards the rivers, harbors and canal of the Nation, an earnest of what the Convention will reflect in the way of public sentiment on this great question is disclosed. There will be notable address by notable men and Capt. J. F. Ellison of Cincinnati, Secretary of the Congress is already enthusiastic over the prospects.

With the Federal Congress in session and the National Rivers and Harbors Congress meeting simultaneously, the National Capital will be crowded with notables, men and women who are making the improvement of the waterways as much of a study as the tariff, and the conservation of our natural resources.

POSTMASTERS TO MEET IN LOUISVILLE, SEPT. 13, 14, 15.

It has been decided by the Postmasters' Association, which includes Presidential offices, and the State League of Postmasters of Third and Fourth class offices, to hold a joint meeting this year in Louisville, Sept. 14th and 15th. The League will meet at 2 o'clock p. m. on the 13th, for the purpose of transacting such business as pertains to League affairs only.

On the 14th and 15th the Association and League will hold a joint meeting for the purpose of discussing postal affairs.

There will be several representatives of the Post-office Department present to give instructions. The new Money Order and Registry System will be explained. Every Postmaster should attend as they will learn more than they would in years at home, and many things they never would learn otherwise.

Can be young men and ladies in the field of "Wireless" or Radio telegraphy. Since the 8th law became effective, and since the Wireless companies are establishing stations throughout the country there is a great shortage of telegraphers. Positions pay beginners from \$70 to \$90 per month, with good chance of advancement. The National Telegraph Institute operates six official institutes in America, under supervision of R. R. and Wireless officials and places all graduates into positions.

It will pay you to write them for full details at Cincinnati, O., or Philadelphia, Pa.

A Pleasant Entertainment.

On last Friday afternoon, Mrs. Q. M. Conyer entertained for her daughter, Miss Vera, in honor of her guest, Miss Ella Williams, of Madisonville, from three until five o'clock. With the refreshments and other nice things prepared for them, these precious little maidens surely enjoyed the afternoon to the limit. Those present were: Misses Geneva Daniels, Nelle Stone, Linda Jenkins, Vernon Calmes, Ruth Haynes, Ruth Moore, Ruth Herrin, Virginia Flanary and Ella Williams.

Gun-Runners of the Persian Gulf

A GROWING MENACE TO
THE PEACE OF INDIA

BY H. MANNERS HOWE

THE feeling is growing throughout the Indian army and Indian government circles that Britain is approaching a bigger campaign on the northwest frontier than has been seen in recent years. Not only are large sections of the tribesmen like the Mahsud Wazirs and others exhibiting signs of increasing turbulence, but the frontier territories from one end to the other are already full of modern arms and ammunition, while more is pouring into them every day by every secluded track leading through Baluchistan and the Afghan hills.

In addition to this, the present Amir, abandoning his father's policy, has allowed thousands of modern rifles manufactured in the arsenal at Kabul to reach the hands of his own

followers, and the probable co-operation of the latter in a frontier war against the Indian Raj may easily involve the Indian government with Afghanistan as well.

All this, as every Indian officer is involved in the continuance of the persistent gunrunning which is marking the growing war fever on the Indian northwest frontier through the Persian gulf. It is not too much to say that the peace and safety of India and visitors depend upon the suppression of this trade, and yet, owing chiefly to the paucity of British naval resources there, there can do little or nothing.

Remarks in the chief center of this nefarious calls.

GOOD POSITION FOR TRAINING CAMELS TO COUNTERACT GUN-RUNNING

had by an

peace and, unhappily, by British merchants. The

sultan, who is under British protection, derives a

large revenue from it, but although negotiations

with him for its prohibition might require diplo-

matic handling owing to his treaty obligations

with at least one other power, it is the only effec-

tive means of avoiding the outpouring of blood

and treasure on the Indian frontier.

At present the efforts of the British navy are handicapped by the fact that the hydrographical conditions of Muscat, at the head of the whole littoral of the gulf, do not allow preventive ships to go very close to the coast. It is this fact which enables the gun-running dhows to escape the vigilance of British cruisers.

Thus the dhows which put out from Muscat with their contraband cargoes adopt the simple plan of hugging the coast within the shallow-water limits. If they are making for Kowet, which is the center of the gun trade for Mesopotamia and western Persia, they can proceed all the way in comparative safety, otherwise they sail just far enough to be in a position to make a dash for Jash or some other port on the Makran coast, where their cargoes are received for conveyance by caravan via Baluchistan to Afghanistan and the northwest frontier Kheles.

The two most active firms engaged in this trade are owned by a Baluchi and a Frenchman. There are also in Muscat numerous small shops engaged in the trade, and numbers of the agents are "banfas" from India. Mysterious cargoes are also dropped overboard in the dead of night into swift-sailing dhows and got away to obscure places along the eastern coast. It will be impossible to check this growing peril to England's peace in India without a large number of small-draught patrol boats and an efficient coastguard on the Makran coast.

"No craft," says Mr. H. Warrington Smyth, in "Mast and Sail in Europe and Asia," "has played a greater part in the world's history than the dhow. The lateen yard is as much the emblem of the faith as is the crescent. The true bngara, bagala, or Arab dhow, the probable parent of all the lateen-rigged offspring, is now mostly to be met with in the Red sea and eastward to the Persian gulf, Karachi, Bombay, along the Malabar coast, and down the coast of Africa to Zanzibar, marking its voyages with the fair wind of the mon-

OLD PORTUGUESE FORT AT MUSCAT

A TYPICAL DHOW IN THE PERSIAN GULF

soon, and quite capable of holding its own in the hard weather often to be met with in the Indian ocean. Notwithstanding local differences of detail these vessels vary very little as a class; they are generally grub-built, having a long overhang forward. There is great beam and rise of floor and a very raking transom stern. There is generally a high poop and foredeck, the rest of the vessel being practically open. The rig consists generally of mahn and mizzen lateens. The mainmast is a big spar stepped amidships, with a great rise forward."

A correspondent from India writes that the British gunboats in the Persian gulf have been very active in suppressing the traffic in rifles and ammunition. The arms were being landed on the Makran coast and thence were carried by caravans for sale to the tribesmen on the northwest frontier of India, to be used against the British troops when the next trouble comes. The navy men are reported to have been very successful, and made several good hauls of rifles and ammunition. To reduce still further the gun-runners' chances of profit, four companies of the Fourteenth Sikhs were sent from Ootutta to intercept caravans in the neighborhood of Robat. One of our illustrations depicts the entraining of some of the transport camels at Jacobabad in Sind, en route to Nushki, whence the column marched to Robat.

As a rule, when camels are entrained they are loaded on open trucks, but on this occasion it was thought advisable to make use of closed cars. The "ouots" strongly objected to being loaded, but with a rope behind the hocks and a steady, per- suasive strain on the nose rope they were eventually hauled or pushed in. Once in the car the camels were made to kneel down in the sand which had been spread on the floor, their knees were then tied so that it was impossible for them to straighten out their forelegs.

The cars were each loaded with six camels, three in each end, facing inward. The space in the middle was utilized for saddles and fodder for the journey. Two camels also traveled in each car. It may be remarked that Brahuis differ from most people in that they do not notice that the camel has a particularly offensive odor. The camels bubbled and protested while being loaded, but they soon settled down and began to eat the fodder provided for them. It took five hours to load the first train of 120 camels. Only one camel had an unusually large hump could not be pushed through the door, and he was trussed like a chicken and carried bodily in by about 15 men.

The bird's-eye view shows the territory through which the contraband guns are run. In the foreground are the bare rocky hills surrounding Muscat, the capital of Oman, while to the right is the equally bare coast of Makran, from which gun-running routes lead inland to Afghanistan. Oman is an independent sultanate occupying the southeastern end of the peninsula of Arabia. It reaches along the Persian gulf, the gulf of Oman and the Arabian sea from El Hasa to the Hadramaut region. The area is about 80,000 square miles. The region along the coast is very mountainous, rising in its highest peaks probably to about 10,000 feet. Behind the mountain chains the country gradually passes into the great desert of Arabia. The most favorable part of the country is in the central valleys, which are characterized by a temperate climate and rich vegetation. The chief products are dates, which constitute the main article of export, and other fruits. Pearls

The king said nothing, thanked the girl, and he and his band soon found their way out of the woods.

But when he reached his palace, he determined to reward the girl for giving him the water and at the same time to teach her a lesson in politeness.

Sending to his jeweler, he bade him make a silver cup with two handles and deliver it to the young girl without a word from whence it came.

Perhaps a month after this the king again hunted in that same forest, sought the little hut, and asked the girl for another drink of water.

This time she entered the house and came out with a beautiful silver cup full of sparkling water.

"Now," thought the king, "she has certainly learned a lesson." But never was he more mistaken, for the poor, ignorant girl took a handle in each hand and for the second time offered her liege lord nothing but the side of the cup.

The king rode away deeply perplexed. He was still resolved to teach the girl the polite way to hand a cup without directly rebuking her, and many were the hours he spent in cudgeling his brains for some way in which to do it. At last a bright idea struck him, and he sent for his jeweler a second time.

"Make me," said he to the man, "a silver cup, heavily chased, and with my royal crest and put three handles on it."

The jeweler much surprised (for remember no such thing had ever been heard of up to this time), did as he was told, and soon the mug was finished. As before, the king had it privately sent to the girl who lived in the hut.

One day not long after this for the third time he rode into that forest, and taking the now well known path soon reached the cottage. Dismounting he knocked at the door and asked bumbly for a drink of clear water.

The girl immediately came out with the beautiful three-handled cup and taking two of the handles in her hands she offered him the third.

So the king rode away, well pleased with his strategy, and reaching home, ordered three-handled cups to be made in every sort of ware, and they became so popular that we now have them in all our shops and stores.

POPULAR GAME OF "CUTTING"

Always Finds Favor With Boys and Girls—Simple Prizes Given to Winners.

A game of "cutting" always finds favor with boys and girls. Provide each person with an old magazine, a pair of scissors, a small cup of home-made paste and a brush made by folding a piece of paper many times and then finely slushing one end. Besides these things give to each player several sheets of plain paper a little larger than a magazine page. Each person is to cut out any picture or parts of pictures he chooses and mount them on the plain paper to make new pictures. After half an hour all of the pictures should be placed where they may be seen. Simple prizes should be given to those making the prettiest, the most comical or the most original sheets.

BETTY'S CAKE-WALK.

When Betty saw a cake-walk,
She laughed at all the fun,
And thought it was the strangest thing
She'd seen beneath the sun.
The bowing and the dipping
She taught her dolls next day,
Though it was quite ridiculous
To walk that silly way.

When Betty takes a cake-walk,
There's something at the end;
She doesn't lead to scope and bow,
But turns and turns and bends.
But onward like a soldier
She marches to the fore;
The end of Betty's cake-walk
Is at the pantry door.

HOW LOVING-CUP ORIGINATED

Interesting Story Telling How Powerful King of Ancient Taught Ignorant Lesson.

The so-called "loving-cup" is common nowadays and we see it everywhere. But many years ago there were no such things as these queer three-handled affairs, and the following story tells how they first happened to be made:

Once upon a time, centuries before us there lived a great and powerful king who was extremely fond of hunting. He was one day in a huge forest pursuing a stag, but it was so fleet and clever that it eluded him and his band of followers, and led them entirely out of their way. After wandering about in a hopeless manner, the king finally came upon a little hut and the king himself dismounted and rapped smartly upon the door.

A young girl answered his knock and soon showed the men the right path. The king was about to go when he saw a well near the house and at the sight of the clear water immediately felt thirsty, and going back, asked the girl for a drink. Without hesitation she went into the house and came out with an earthen jug filled with the well water. But, instead of offering his royal majesty the handle, as most people would, she held that herself and handed him the cup the wrong way.

The king said nothing, thanked the girl, and he and his band soon found their way out of the woods.

But when he reached his palace, he determined to reward the girl for giving him the water and at the same time to teach her a lesson in politeness.

Sending to his jeweler, he bade him make a silver cup with two handles and deliver it to the young girl without a word from whence it came.

Perhaps a month after this the king again hunted in that same forest, sought the little hut, and asked the girl for another drink of water.

This time she entered the house and came out with a beautiful silver cup full of sparkling water.

"Now," thought the king, "she has certainly learned a lesson." But never was he more mistaken, for the poor, ignorant girl took a handle in each hand and for the second time offered her liege lord nothing but the side of the cup.

The king rode away deeply perplexed. He was still resolved to teach the girl the polite way to hand a cup without directly rebuking her, and many were the hours he spent in cudgeling his brains for some way in which to do it. At last a bright idea struck him, and he sent for his jeweler a second time.

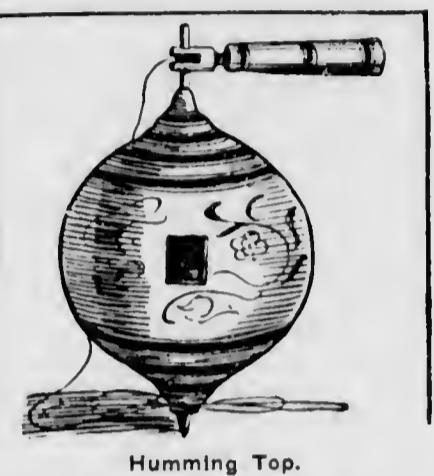

"Make me," said he to the man, "a silver cup, heavily chased, and with my royal crest and put three handles on it."

The jeweler much surprised (for remember no such thing had ever been heard of up to this time), did as he was told, and soon the mug was finished. As before, the king had it privately sent to the girl who lived in the hut.

One day not long after this for the third time he rode into that forest, and taking the now well known path soon reached the cottage. Dismounting he knocked at the door and asked bumbly for a drink of clear water.

The girl immediately came out with the beautiful three-handled cup and taking two of the handles in her hands she offered him the third.

So the king rode away, well pleased with his strategy, and reaching home, ordered three-handled cups to be made in every sort of ware, and they became so popular that we now have them in all our shops and stores.

Hummer Top.

England as early at least as the fourteenth century, when its form was the same as it is now.

Today boys play with the hummer-top. This is hollow, having at its crown a peg, round which is wound a string; this being pulled through a kind of fork, gives motion to the top and sets it spinning—the fork and the

Peg Top.

string being left in the spinner's hand. In spinning the top, care should be taken to wind the string firmly and evenly on the peg, and when it is pulled out, neither too much nor too little force should be used, and a firm and steady hand should be employed, while the top should be held in a perpendicular position. The string should be drawn with a steadily increasing force, or the top will not hum properly.

There are various kinds of peg-tops, and they also vary in shape, some being much rounder than others. Those are the best which are shaped like a pear. There is also great variety as regards the shape and size of the peg, which in some tops is short and thick, in others long and tapering. Again, tops are made of different kinds of wood, some being made of deal, others of elm, some of yew-tree and others of boxwood. These last are the flossers, as highly prized. Some of the very best tops are made of lignum-vitae, with long, handsome pegs.

MOUSE TRAP IS VERY USEFUL

Easily Made by Placing Piece of Stout Paper Over Top of Earthenware Jar.

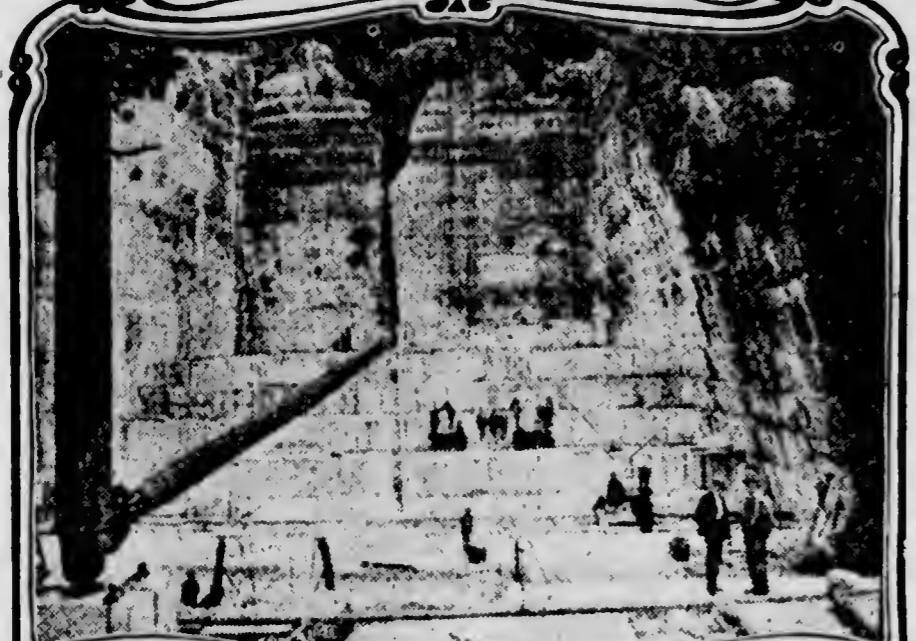

If you have no cat and find the mice in your house getting altogether too bold for comfort, or if you would like to keep some mice for pets, a home-made trap will catch them.

Over the top of an earthenware jar fasten a piece of writing paper, tightly binding it with a string or elastic band. In the center of the paper cut a cross. Set the jar in the closet, and suspend by a string a piece of cheese over the center of the jar so that the mice can reach the top. If there are any mice in the closet the bait will attract them, but just as soon as the first mouse reaches the center of the paper he will drop into the jar and the paper will fly back into place again, ready for the next comer. A trap arranged in the same manner can be used for the capture of field and harvest mice, which make odd and amusing pets.

A barrel covered with stiff brown paper can be used for common rats, but they will gnaw out unless the barrel be partly filled with water.

The Usual Crop.
"Are you trying to raise anything on your suburban place?"
"Yes; a mortgage."

Excavating Marble and Granite

WORKING FLOOR OF A MARBLE QUARRY

CUTTING GRANITE WITH A PNEUMATIC DRILL

IN THE minds of most people marble and granite, two stones of widely different characteristics, are inherently symbolical of beauty, strength and permanence. They preserve the tradition of something stable and enduring. Man's use of marble and granite has, of course, dated from the days of antiquity; indeed, of all components of the earth's crust, no two, perhaps, have been more universally pressed into the service of construction and decoration.

The world's yield of the finer classes of marble proceeds from many countries, Italy, France, Heligum, Norway, Sweden and America being especially prolific in deposits.

Apart from the British Isles, where, in particular, the gray Aberdeen and red Peterhead varieties are justly famed, granite occurs in Sweden, the Tyrol, Italy, Sardinia, North America and other districts.

Qualities of Marble and Granite.

In chemical composition marble is essentially calcium-carbonate, or carbonate of lime. As a consequence, the stone is very sensitive to the action of chemical agents present in the atmosphere. On the other hand, while marble is in this way more rapidly attacked than many other stones, its power to resist the mechanical agents of weathering, which are generally the most destructive, makes it a comparatively durable substance. The great variety of colors shown by marble is due mainly to the presence of companion minerals. Iron, when present in the ferrous state, produces color varying from light to dark green; manganese and cobalt involve pinkish hues. Accessory minerals, in short, give rise to an almost endless association and blending of colors, shades, veins and patterns.

Granite is a crystalline-granular aggregate of quartz, felspar and mica, and comprises all varieties of texture. Generally it is the constituent felspar which gives the ruddy or the gray appearance differentiating the rock. Unlike marble, granite cannot be split up with saws, and hence the expense and labor of quarrying and preparing the latter material for building and other purposes is relatively much greater.

According to the state geologist of Georgia, probably no building stone in the United States has in recent years met with such universal favor and given greater satisfaction than Georgia marble. It is, however, curious to learn that, notwithstanding the enormous quantity of native marble capable of being quarried, and the large number of undeveloped deposits which the United States as a whole possesses, considerable supplies of the material are imported (mostly from Italy) for statuary purposes and interior decoration. The growth of the use of Georgia marble for public buildings in America is, however, proceeding on satisfactory lines, and its merits are becoming generally known. The imposing Minnesota state capitol was built of white marble from the Amicalola quarries, Pickens county; the Rhode Island state capitol, the Carnegie public library, Atlanta, and the Corcoran art gallery, Washington, of stone from the quarries of a southern marble company.

Greek Marbles.

In recent years the extensive quarries of Mount Pentelicus, a range situated eight miles northeast of Athens, have been re-explored, and are being worked by a British company. From this classical center came the material used in the erection of some of the world's most famous buildings, among them the Parthenon and the Propylaea. Pentelicus marble is almost pure carbonate of lime. Owing, however, to the presence of minute grains of pyrites, the marble, which is a clear white on being worked, assumes a soft ivory tint after exposure, a feature which materially adds to its value for decorative purposes. Blocks of immense size, up to 1,000 tons, in fact, are frequently dislodged from the quarry bed, and, with suitable machinery, may be cut to any required dimensions. The private railway of

TERRIBLE CASE OF GRAVEL

Baker City, Ore., Man Suffered 25 Years.

Charles Kurz, 1618 Center St., Baker City, Ore., says: "For 25 years I suffered agony from gravel. So intense was the pain when the stones were passing, that I had to lie on my back and brace my feet, often being forced to scream. On one occasion two stones became lodged and I could not pass the urine for two days. I spent hundreds of dollars without relief. At last I began taking Doan's Kidney Pills. They are the only remedy that wards off these attacks."

Remember the name—Doan's. For sale by all dealers. 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

Sign of Recovery.

"If when the devil is sick a monk he will be," said Rosa Stahl sagely, "then the devil gets well in double quick time. Witness that young 'divil with the ladies,' my kid cousin. Last winter he was ill, so ill he didn't have any sense of humor left nor any sense either. I was staying at the same hotel, and when I went in to look after him I virtuously remarked that his room was no place for a 'Chorus Lady' and promptly shooed me out. (A few years ago I spanked that kid.) Then he got scared and sent for a doctor and the doctor sent for a trained nurse. For several days I got bulletins of his progress from the chambermaid. The fourth morning she set my mind completely at rest.

"Sure, ma'am," said Maggie, "an' I think he do be gettin' along very well. The nurse was sittin' on his lap this mornin'!"

KEEP BABY'S SKIN CLEAR

Few parents realize how many estimable lives have been embittered and social and business success prevented by serious skin affections which so often result from the neglect of minor eruptions in infancy and childhood. With but a little care and the use of the proper emollients, baby's skin and hair may be preserved, purified and beautified, minor eruptions prevented from becoming chronic and torturing, disfiguring rashes, itchings, irritations and chafings dispelled.

To this end, nothing is so pure, so sweet, so speedily effective as the constant use of Cuticura Soap, assisted, when necessary, by Cuticura Ointment. Send to Potter Drug & Chem. Corp., sole proprietors, Boston, for their free 32-page Cuticura Book, telling all about the care and treatment of the skin.

Tuberculosis in the Prisons.

The fact that 100,000 prisoners are discharged from the jails and prisons of the country annually, and that from 10 to 15 per cent. of them have tuberculosis, makes the problem of providing special places for their treatment while they are confined a serious one.

So important is the problem that the Prison Association of New York in co-operation with the State Charities Aid association, is preparing to inaugurate a special campaign for the prevention of tuberculosis in the penal institutions of the state, and will seek to enlist the co-operation of all prison physicians and anti-tuberculosis societies in this work.

Important to Mothers

Examine carefully every bottle of CASTORIA, a safe and sure remedy for infants and children, and see that it bears the

Signature of *Chas. H. Hitchins*,
Use For Over 30 Years.
The Kind You Have Always Bought.

A Specialist.

"I don't see you on the messenger force any more, Jimmy," said the lad with the envelope in his hand.

"No; I've got a good job with a dog-fancier," replied Jimmy, as he puffed a cigarette.

"'Wild' dog-fancier? What do you do—feed the dogs?"

"Naw! When a lady comes in and buys a pet dog I teach 'er 'ow to whistle."

A Fake Camera.

"Yonder is a beach camera fiend," said the first bathing girl. "They are disgusting, I think."

"This one is particularly disgusting," declared the second bathing girl. "After I had posed all morning for his benefit, he ate his lunch from that box."

TO DRIVE OUT MALARIA AND CHILDHOOD SYSTEM

Take the OLD STANDARD HOWE'S TAN-LESS CHILL TONIC. You know what you are taking. The formula is plainly printed on every bottle, and it is the same for the Tan-less form. The Quinine drives out the malaria and the iron builds up the system. Sold by all dealers for 30 cents. Price 60 cents.

An Operative Expletive.

"Bifferton is awfully gone on grand opera, isn't he?"

"I should say he is! Why, he even swears by Gadski!"

Dr. Pierce's Pleasant Pills regulate and invigorate stomach, liver and bowels. Sugar-coated, tiny granules. Easy to take and carry.

And He Knew Her.

"You say your wife is going to spend the balance of the summer in Europe?"

"She says."

"Do you know that it will cost you at least a thousand dollars?"

"I figured it at about that."

"But, good gracious! Is it worth that much just to have her travel for a couple of months?"

"I think so."

Her Rest.

"How do you expect to spend your summer vacation, Mrs. Brown?"

"Frying fish for the men as usual, I suppose."

"Hubby, I gave your light pants to a poor tramp."

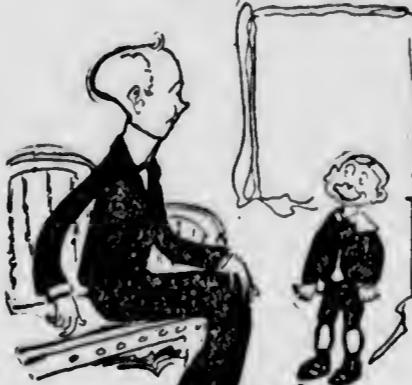

"And what am I going to wear this summer? Kilts?"

Lots of us never put off till tomorrow what we can have done for us today.

Mrs. Winslow's Soothing Syrup. For children tooth-aching, softens the gums, reduces inflammation, relieves labored cough. 2oz. bottle.

The crop that never fails year after year is trouble.

GAVE HIS AWAY.

Her Little Brother—Say, are you goin' ter marry my sister Bess?

Her Suitor—Why, er—er don't know.

Her Little Brother—Well, you are. I heard her tell pop she was goin' ter land you tonight.

INFECTION IN THE PRISON

Peculiarly Favorable Field There for the Spread of the Scourge of Tuberculosis.

Only twenty-one prisons in fifteen states and territories have provided special places for the treatment of their tuberculosis prisoners. These institutions can accommodate, however, only 800 patients. In three-fourths of the major prisons and in practically all the jails of the country the tuberculosis prisoner is allowed freely to infect his fellow prisoners, very few restrictions being placed upon his habits. When the congestive mode of prison life is considered, the danger of infection becomes greater than in the general population. New York and Massachusetts are the only states where any systematic attempt has been made to transfer all tuberculous prisoners to one central institution. The largest prison tuberculosis hospital is in Manila, where accommodations for 200 prisoners are provided. The next largest is Clinton prison hospital in New York, which provides for 150.

On Some Ministers.

The worst o' these here shepherds is, my boy, that they reg'larly turns the heads of all the young ladies about here. Lord bless their little hearts, they think it's all right, and don't know no better; but they're the victims o' gammon, Samivel, they're the victims o' gammon. Nowth' else, and wot aggitates me, Samivel, is to see 'em awastin' all their time and labor in making clothes for copper-colored people as don't want 'em and taking no notice of flesh-colored Christians as do. If I'd my way, Samivel, I'd just stick some o' these here lazy shepherds behind a heavy wheel-barrow, and run 'em up and down a 14-inch plank all day. That'd shake the nonsense out of 'em, if anythin' would.—Mr. Weller, Quoted by Charles Dickens.

Where Millions Are Entombed.

The catacombs at Rome were the burial places of the early Christians. They are about 580 miles in extent and are said to have contained 6,000,000 bodies. During the persecutions of the Christians under Nero and other Roman emperors the catacombs were used for hiding places. Under Diocletian the catacombs were crowded with those for whom there was no safety in the face of the day. The art of the catacombs is unique and most interesting. Simple designs are etched in the slabs which seal the tombs. Now and then are small chapels whose vaults are to be found. All are Biblical illustrations, so that the catacombs may be said to be a pictorial Bible in effect.—The Christian Herald.

Selfish Youth.

"Youth is apt to be selfish," said Mrs. Mary E. Wilkins-Freeman, the distinguished novelist, at a Matuchen picnic.

"Woman in her youth," she went on, "is especially apt to be selfish. I never forget the story of the young man from Boston who stood in the center of Boston common in a downpour of torrential rain.

"As he stood there, soaked to the skin, a little boy in a mackintosh accosted him.

"Excuse me, sir," said the boy, "but are you the gentleman who is waiting for Miss Endicott?"

"Yes," the young man answered.

"Well," said the boy, "she asked me to tell you she'd be here just as soon as it clears up."

When Rubbers Become Necessary.

And your shoes pinch, shake into your shoes Allen's Foot-Ease, the antiseptic for the feet. Cures tired, aching feet and takes the aching out of Corns. Always use it for Breaking in New shoes and for dancing parties. Sold everywhere. 25c. Sample milled FREE. Address, Allen S. Olmsted, Le Roy, N. Y.

Domestic Amenities.

"Hubby, I gave your light pants to a poor tramp."

Lots of us never put off till tomorrow what we can have done for us today.

Mrs. Winslow's Soothing Syrup.

For children tooth-aching, softens the gums, reduces inflammation, relieves labored cough. 2oz. bottle.

The crop that never fails year after year is trouble.

WELCOME WORDS TO WOMEN

Women who suffer with disorders peculiar to their sex should write to Dr. Pierce and receive free the advice of a physician of over 40 years' experience—a skilled and successful specialist in the diseases of women. Every letter of this sort has the most careful consideration and is regarded as sacredly confidential. Many sensitively modest women write fully to Dr. Pierce what they would shrink from telling to their local physician. The local physician is pretty sure to say that he cannot do anything without "an examination." Dr. Pierce holds that these distasteful examinations are generally needless, and that no woman, except in rare cases, should submit to them.

Dr. Pierce's treatment will cure you right in the privacy of your own home. His "Favorite Prescription" has cured hundreds of thousands, some of them the worst of cases.

It is the only medicine of its kind that is the product of a regularly graduated physician. The only one good enough that its makers dare to print its every ingredient on its outside wrapper. There's no secrecy. It will bear examination. No alcohol and no habit-forming drugs are found in it. Some unscrupulous medicine dealers may offer you a substitute. Don't take it with your health. Write to World's Dispensary Medical Association, Dr. R. V. Pierce, President, Buffalo, N. Y.,—take the advice received and be well.

**\$2000.00
In Gold
Given Away in Prizes**

To Ladies Who Use Defiance Laundry Starch

Five hundred and seventy-two cash prize divided as follows, to the man, woman or child who sends to us before November 13, 1910, the largest number of trade marks, "THE GLADIATOR," cut from our 16 ounce package, (or two from our 8 ounce package—to be counted as one), we will give **TWO HUNDRED DOLLARS IN CASH**. To the one sending the next largest number **ONE HUNDRED DOLLARS IN CASH**, and to the next twenty, **TWENTY-FIVE DOLLARS** each. To the next fifty, **TEN DOLLARS** each. The next two hundred, **TWO DOLLARS** each. The next three hundred, **ONE DOLLAR** each; in all 572 prizes distributed as follows:

1 Grand Cash Prize, \$200.00	8	200.00
1 Grand Cash Prize, 100.00	100.00	100.00
20 Cash Prizes, 25.00 each	500.00	
50 Cash Prizes, 10.00 each	500.00	
200 Cash Prizes, 2.00 each	400.00	
300 Cash Prizes, 1.00 each	300.00	
572 Prizes, in all, amounting to		\$2000.00

This question may arise in your mind, "How can we afford to do this?" The answer is: we found experience that instead of using \$5,000 for advertising to cover a certain field, by giving \$2,000 of this amount to the ladies in cash premiums and using the other \$3,000 for advertising, we obtain much better results.

Reasons Why You Should Use Defiance Starch

It is the very best cold water starch on the market.

It can also be used as boiled starch.

It contains 16 ounces to the package, as against other brands' only 12 ounces.

One box will wash a dozen or more and the trade marks are in under one part, and divide the price among them.

One box will wash a dozen or more and the trade marks are in under one part, and divide the price among them.

The Crittenden Record-Press

N. E. CALMES Editor and Publisher.

Entered as second-class matter February 1st
at the postoffice at Marion, Kentucky, under
the Act of Congress of March 3, 1879.

One Dollar the Year in Advance.

We are authorized to announce
J. M. Walker a candidate for the
office of County Judge, of Crit-
tenden county, subject to the
action of the Republican conven-
tion, Monday Sept. 12, 1910. Mr.
Walker is an old line Republican
fought through out the civil war
in the Union ranks and having a
full knowledge that the war is
over and a thing of the past with
mollace towards none and charity
for all, asks to be the next coun-
ty Judge.

GRADE CARDS for sale at
this office at 50 cents per 100.

NOTICE TEACHERS

Grade cards can be had at
this office for the low price of
50 cents per 100.

Go to the Main Street Presby-
terian church and hear a splen-
did sermon by Rev. Harrisou.

What profit a man if he
gain the whole world and then
lose his own soul."

HOME ENTERPRISE A SUCCESS

This week a car containing 40
thousand pounds of granite was
received by Henry & Henry the
Monument men of this place. In
this shipment was a large monu-
ment, which is now being erect-
ed on the lot of Mrs. R. W.
Wilson in the new cemetery, and
marks the resting place of one
of Marion's most highly re-
spected citizens. In this car
were also two handsome monu-
ments for the father and mother
of Mrs. Fin Croft of Tolu,
Ky., and another fine monument
sold to Dr. T. W. Twitchell, of
Belleville, Ill.

The Henry Bros., shop and
equipment for handling heavy
monuments is not surpassed by
any of their competitors, and it
has come to be noticeable to all
that are interested in this line of
business that these gentlemen
are among the leaders of all the
firms doing this kind of work in
Western Kentucky.

If you love your neighbor as
yourself you will love to go to
church. If you do not, you need
to go to church.

GOOD SEED WHEAT PAYS

Mr. R. B. Clement a promi-
nent farmer of Crayne, raised
the banner crop of wheat of the
county from a new seed wheat
he chanced to get from the
North, last fall. His crop from
this seed averaged forty bushel
to the acre and he is selling it
now readily for seed at \$1.50
per bushel. And it goes like
hot cakes, in fact will soon be
gone. All wishing this fine
wheat had better see him at
once as we believe every farmer
should sow the wheat that will
bring him the greatest number
of bushels per acre. This wheat
is called "Prize Taker" and de-
serves the name.

RIBBON SALE

I will, until Saturday Sept.
17th sell my nice stock of ribbon
at cost. Come and get some
bargains.

MRS. LOTTIE TINSLEY.

NOTICE

The Board of Trustees request
that all first grade children be
started to school at once, as
later after arriving at the school
age it will be almost impossible
to find a class for them and no
end of trouble for the teacher.
If your children are not quite
six years old, send them now if
you expect to send them and
pay until they attain the school
age.

FOR SALE

My residence on Gum St. in
Marion, Ky., occupied by G. G.
Hammack, nice house, rents
well and has every convenience

MRS. ALMEDA LAMB,

Marion, Ky.

IT SAVED HIS LEG.

"All thought I'd lose my leg," writes
J. A. Swenson, of Watertown, Wis.
"Ten years of eczema that fifteen doc-
tors could not cure, had at last laid me
up. Then Bucklen's Arnica Salve
cured it sound and well." Infallible
for skin eruptions, eczema, salt rheum,
boils, fever sores, burns, scalds, cuts
and piles. 25c at J. H. Orme's and
Haynes & Taylor's.

EPWORTH LEAGUE PROGRAM

Leaders—Miss Frances Blue
and Coleman Foster.

Subject—Mercy To The Fallen,
Opening Song.

Scripture lesson Obadiah 1:12-
16 Luke, 16 Luke 15:1-7.

Song.

Scripture references.

Opening meeting.

1. Are we willing to extend a
helping hand to the social out-
casts?—Miss Daisy Smart.

2. What is our relation as
Christians to the Double Stand-
ard of Morals?—Miss Velda
Hicklin.

3. Do we not need to consider
ourselves lest we also be tempt-
ed?—N. E. Calmes.

Duet ---Misses Lawson and
Sutherland.

Benediction.

Beware of Ointments for Catarrh That
Contain Mercury.

As mercury will surely destroy the
sense of smell and completely derange
the whole system when entering it
through the mucous surfaces. Such
articles should never be used except on
prescriptions from reputable physi-
cians, as the damage they will do is
ten-fold to the good you can possibly
derive from them. Hall's Catarrh
Cure, manufactured by F. J. Cheney
& Co., Toledo, O., contains no mercury
and is taken internally, acting directly
upon the blood and mucous surfaces of
the system. In buying Hall's Catarrh
Cure be sure you get the genuine. It
is taken internally and made in Toledo,
Ohio, by F. J. Cheney & Co. Testi-
monials free.

Sold by druggists. Price, 75 cents
per bottle.
Take Hall's Family Pills for consti-
pation.

We have been forced to cut
out nearly all our advertising
this week and give our readers a
patent sheet in consequence of a
drunken printer. Of course we
fired him, and yet when sober
he was the best all round man
we ever had. Put yourself in
our place before you blame us.

All communications came in to
late this week. We will print
them next week, as many of
them are too good to be left
over, especially those with
names signed.

AFTER DOCTORS FAILED

Lydia E. Pinkham's Vegeta- ble Compound Cured Her

Knoxville, Iowa.—"I suffered with
pains low down in my right side for a
year or more and was so weak and ner-
vous that I could not do my work. I
wrote to Mrs. Pinkham and took Lydia
E. Pinkham's Vegetable Compound
and Liver Pills, and am glad to say that
your medicines and kind letters of di-
rections have done more for me than
anything else and I had the best physi-
cians here. I can do my work and rest
well at night. I believe there is nothing
like the Pinkham remedies."—
Mrs. CLARA FRANKS, R. F. D., No. 3,
Knoxville, Iowa.

The success of Lydia E. Pinkham's
Vegetable Compound, made from roots
and herbs, is unparalleled. It may be
used with perfect confidence by women
who suffer from displacements, inflam-
mation, ulceration, fibroid tumors, ir-
regularities, periodic pains, backache,
bearing-down feeling, flatulence, indi-
gestion, dizziness, or nervous prostra-
tion.

For thirty years Lydia E. Pinkham's
Vegetable Compound has been the
standard remedy for female ills, and
suffering women owe it to themselves
to at least give this medicine a trial.
Proof is abundant that it has cured
thousands of others, and why should it
not cure you?

If you want special advice write
Mrs. Pinkham, Lynn, Mass., for it
is free and always helpful.

Our beloved friend, W. B.
Yates, who rested a week at
home after his great work in
the greatest revival ever held in
the State of Oklahoma, left
again yesterday. He is truly
the greatest singing Evangelist
in the South.

A PACKAGE OF MEDICINE FREE

Every subscriber to this paper who
will write to the address below will re-
ceive, free of expense, a package con-
taining small boxes of all the follow-
ing well known medicines: Lane's Tea
for the bowels, Kidnets, for the kid-
neys, Lane's Pleasant Quinine Tablets
for colds and grip, and Sherman's
Headache Remedy. Address Orator
F. Woodard, LeRoy, N. Y.

FOR SALE

Sample Helps Frail Women

So many women are dragging out
weary lives just because their diges-
tive organs are weak. The result is
poor circulation, nervousness and on
the verge of invalidism. It is often very
unnecessary and the woman's own
fault.

The first thing to do is to look to the
welfare of your bowels. There the trou-
ble usually lies. All physicians know
that a large percentage of women are
habitual constipated and from this re-
sults indigestion, piles, weak heart, etc.
But there is no use taking "female rem-
edies" and things of that kind until you
have started your bowels to moving.
You will find that when the bowels move
regularly once or twice a day your
petty ills will disappear. Take a good,
mild laxative tonic like Dr. Caldwell's
Syrup Peppermint for awhile and you will
find yourself rapidly getting better and
stronger. Your bowels will regulate them-
selves and work at regular times and
then your headaches and dizziness will
disappear. Don't take strong cathartic
pills or salts, but just such a mild and
pleasant-tasting remedy as Dr. Caldwell's
Syrup Peppermint.

You can obtain a bottle of your druggist
for fifty cents or one dollar, and
either size may be enough to perman-
ently cure you. Thousands of women
keep it regularly in the house and will
no longer be without it, as it cures them
and can be used with safety by every
member of the family down to the
youngest child, but if you have never
used it take the advice of Mrs. Earl S.
Cox, 409 Twenty-fifth street, Moline, Ill.,
and Mrs. Ellen Duncan, Muncie, Ind., and
send to Dr. Caldwell for a free trial bot-
tle. It will do as you say for yourself.
That it will do in your own case. That
it will cure you, as it did them, there is
no doubt.

Dr. Caldwell personally will be pleased

to give you any medical advice you may
desire. Write yourself a family prescription
to the stomach. Liver or bowel absolutely
free of charge. Explain your case in a
letter and he will reply to you in detail.

For the free sample simply send your
name and address on a post card or
otherwise. For other remedies the doctor's
address is Dr. W. B. Caldwell, R. 500 Cal-
well building, Monticello, Ill.

A BIG REVIVAL

Rev. W. T. Oakley is at Sulli-
van, Ky., in a big revival meet-
ing. He is doing the preaching
himself and as we go to press
eleven conversions has been the
result.

Sore Eyes of Three Years Standing
cured. Miss Effie Faulkner, New
Castle, Pa., writes: Sutherland's Eagle
Eye Salve cured me of a case of sore
eyes of three years standing. I cheerfully
recommended it to any one in need
of such a remedy.

FOR SALE

Nineteen one year old high
grade Shropshire ewes; twenty-
eight two and three year old
Shropshire ewes; one two-year-
old Shropshire buck, also ten
excellent buck lambs and a num-
ber of nice ewe lambs. Will sell
one or all to suit purchaser.

J. R. SUMMERS,
Salem, Ky.

DOES YOUR BACK ACHE?

If it does you should know that back-
ache is generally caused by weak kid-
neys. A medicine called "Kidnets"
has all its ingredients printed on the
label so that everyone may know just
what is in it. It is the great kidney
and bladder medicine. It stops fre-
quent urination. Druggists and deal-
ers sell it for 50c.

Watch for our next weeks
special sale advertisement.

M. E. FOHS.

Save your peach seed. Dry them and bring them to us. We will pay 50c. per bushel for same. T. H. Cochran & Co.

Roy Terry holding a position as stenographer in Chicago, has been here the past week visiting his parents.

Sturgis colorad team came down Saturday to cross bats with Marion team at Bighams Park, receiving a white wash from Marion.

FINE HOG E. S. Love has a fine male Poland China hog. Rate \$1.00. In care of Chas. Lewis.

J. W. Rascoe, President of the County Union of Crittenden, returned Sunday from a two weeks visit to relatives at Mayfield, Paducah and other points in the "penarie." He left Sunday evening for Tolu, to be ready to open his school Monday morning.

WANTED A good man wanted in every county in Kentucky. The greatest agents proposition on earth \$25 to \$35 weekly.

Address J. B. BALLING, Beaver Dam, Ky.

Miss Lucile Pope, a charming little maid, of Marion and one of the most gifted musicians we ever heard, has just returned from a several weeks visit to friends and relatives at Joy, Hampton, Lola and other points of Livingstyn county.

Bring your peach seed in any time between now and Sept. 15 will pay you 50c. per bu. if dry. T. H. Cochran & Co.

Carrol Welch and Miss May Hoyt, of Sturgis, were guests of friends here from Saturday until Monday, attending camp-meeting at Hurricane Sunday.

T. M. George, of Salem, one of the most prominent farmers of Livingston county, with his son, W. T. George, took the train for Hopkinsville Sunday to place his son in school.

We want 100 bu. of peach seed. Bring them to us. Will pay you 1c. per lb. if dry. T. H. Cochran & Co.

BETTER THAN A CURE It is well to cure a cold, but better to prevent it. As soon as you feel a cold coming on, take one or two "Lane's Pleasant Quinine Tablets." You will not have a cold and the Tablets will leave you feeling better than ever. They cure grip in a few hours. 25c a box at druggists and dealers.

SOMETHING FOR HEADACHE Nothing else, aside from money, is so universally sought for as a cure for headache. Headache powders are not safe and they give only temporary relief in any event. The chocolate-coated and capsule-shaped pills called Sherman's Headache Remedy and sold by druggists and dealers at 10c. and 25c. are recommended as the best headache cure.

Rev. W. D. Humphrey, of ElDara, Ill., is here visiting relatives. Since his arrival in the State he has closed a successful revival meeting in Christian county.

Will soon have a complete line of fall and winter goods at the right prices. C. B. LOYD, Fredonia, Ky.

Mrs. Fannie Castleberry, of Princeton. Mrs. Alice Hyle and daughter, Miss Dixie, of St. Louis, Mo., and Mrs. F. W. Hawes of Madisonville, are guests of Mrs. W. N. Rochester this week.

FOR SALE—One Jersey cow 5 years old. Address.

C. W. LOVE, Sheridan, Ky.

BEST EVER USED.

A. B. Heinlein, Harrison, Idaho, says: "I have used Dr. Bell's Pine Tar Honey for coughs and colds and it is the best I have ever tried." Look for the Bell on the bottle.

WHAT BACKACHE MEANS

Generally backache means that the kidneys are diseased. If they are, do not waste a moment, but begin at once a treatment with Kidnets, the greatest of kidney and backache remedies. Delay may mean a fatal ending, so do not delay. Druggists and dealers sell Kidnets at 50c. a box, and guarantee satisfactory results.

BIRTHDAY DINNER

Mrs. Mollie Howerton, in honor of her birthday entertained the following guests at dinner on last Saturday: Judge J. G. Rochester, W. N. Rochester and family, W. J. Johnson, and family, Gray Rochester, Misses Mattie Groom and Elizabeth Quisenberry and Mrs. Fannie Castleberry, of Princeton.

ASK THEN ABOUT IT

For many years physicians and nurses have considered Kemp's Balsam the best cough cure. Every druggists and dealer in medicine sell and recommends Kemp's Balsam. Ask the doctor, the nurse, or the druggists about it. It is for coughs, irritations of the throat, bronchitis, asthma and all throat and lung troubles. The price is 25c. and 50c. a bottle.

Mrs. Love and her sister, Miss Maurie Love have returned from St. Louis, where they have been studying the styles in Millinery. Watch the paper for the Opening.

What To Do In Case Of Accident.

If skin is broken apply Dr. Bell's Anti-Pain at once and the wound will heal quickly and never get sore. Used internally and externally.

Will you try a bottle on our recommendation? Haynes & Taylor.

WANTED

A good farm hand, single man preferred.

I. L. Bradburn,

R. R. 5 103 S. Marion, Ky.

FOR SALE OR TRADE

A small farm of 25 acres, all in high state of cultivation, on the Marion and Shady Grove road, three and one half miles of Marion. Good new three room dwelling, good cistern, good stable and all other out buildings. Call or address.

E. W. CRIDER,

Marion, Ky. Route 2.

EVER WATCH

A Little Care Will Save Many Marion Readers Future Trouble.

Watch the kidney secretions. See that they have the amber hue of health.

The discharges not excessive or infrequent.

Contains no "brick-dust like" sediment.

Doan's Kidney Pills will do this for you. They watch the kidneys and cure them when they're sick.

G. B. Johnson, 413 Gum Street, Marion, Ky., says: "For five years I suffered from kidney complaint, brought on by hard work. Whenever I caught cold it settled on my kidneys and at such times my suffering was aggravated. The kidney secretions were irregular in passage and I was often obliged to arise during the night. There was a dull pain in the small of my back and when I arose in the morning, I felt lame and stiff. I tired easily, was nervous and also had dizzy spells. When Doan's Kidney Pills came to my attention, I procured a box at Haynes & Taylor's Drug Store and after I finished the contents, I was cured. It gives me pleasure to state that time has proven my cure to be a permanent one. You are at liberty to use this statement for the benefit of other kidney sufferers."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

Remember the name--Doan's--and take no other.

Dr. Della (Kevil) Stephens, of Ashville, N. C., is the guest of her parents, Judge and Mrs. J. B. Kevil arriving Friday and will remain a month.

FOR FALLING HAIR.

You Run No Risk When You Use This Remedy.

We promise you that, if your hair is falling out, and you have not let it go too far, you can repair the damage already done by using Rexall "93" Hair Tonic, with persistency and regularity, for a reasonable length of time. It is a scientific, cleansing, antiseptic, germicidal preparation, that destroys microbes, stimulates good circulation around the hair roots, promotes hair nourishment, removes dandruff and restores hair health. It is as pleasant to use as pure water, and it is delicately perfumed. It is a real toilet necessity.

We want you to try Rexall "93" Hair Tonic with our promise that it will cost you nothing unless you are perfectly satisfied with its use. It comes in two sizes, prices, 50 c. and \$1.00. Remember, you can obtain Rexall Remedies in this community only at our store--The Rexall Store--Haynes & Taylor.

FOR SALE

A fine black Spanish Jack two years old. Will sell for cash, on time or trade for stock. Address C. E. Glark.

MARION : : : KENTUCKY

LARGE AND SMALL FAMILIES.

Where the population is largely agricultural and isolated, and where labor is scarce, the husbandman is proud to raise a large family, for the boys in time will help to lift the labor from his shoulders, and also there is always plenty of work for the girls to do about the farm. Moreover, food is plentiful and other desires are few, but no such stimulus for a large family exists in urban life, where it is often necessary to live in a flat, the very limitations of which point to the inadvisability of a numerous progeny, says Indianapolis Star. Moreover, as the individual rises in the social scale former desires become present needs. The coming of numerous children would mean the sacrifice of these needs by the parents, the descent to a lower standard of living, and the parents will not consent. Finally science has shown that a small family well taken care of makes a better showing in future generations than a large family poorly looked after. The fewer children of the well-provided-for family will actually show a more numerous progeny in the third generation than will the underfed and neglected children of the larger family. Eugenics is a big question, and a conscientious investigation of it will convince anyone that dogmatic assertion in that field is a hazardous performance. It is a general rule in biology that species with the most numerous offspring are those that bring fewest perfect and efficient individuals to maturity.

A Rhode Island traveling agent who was disappointed in the demand in a certain section for the fireless cookers which he was offering, discovered that the farmers of "Little Rhodey" have taken to the use of their incubators for summer coking. Like the discovery of roush pig in China, this utilization of the incubator was the result of accident. A husband who had forgotten to put on the pork and beans in accordance with a promise to a wife "out shopping," dashed the beans into an incubator, thus saving his bacon at the expense of a few chicks which were called out to death in a fervent pork-and-beans atmosphere. The idea of both raising and cooking chickens in incubators is depressing to the manufacturers of fireless cookers.

President Taft has signed orders which provide for the further withdrawal of coal lands from entry and appropriation for mining purposes. The aggregate of such withdrawals now reaches over 71,500,000 acres. This means that the enormous area in question is to be preserved by the government for disposition in the future and that it is not to fall into the hands of grasping monopolists, says Troy Times. Coal lands may be open to agricultural entry, but the rich deposits underneath are to remain public property, subject to such arrangement as may be made in the general interest.

The ramming of the gunboat Castine which as a result lies on the beach at Provincetown, Mass., full of water, was due to a miscalculation in mimic warfare similar to that which caused the sinking of the French submarine Pluviose and the drowning of her entire crew. But in the case of the Bona, which struck the Castine, the mistake was made in the line of duty, whereas the loss of the Pluviose was due to "fool trick" on the part of her commander, who miscalculated when attempting to dive under a passenger steamer merely for spectacular effect.

The first sham battle in the air is reported from Vincennes, France, where balloons carried guns to the height of 325 feet and discharged them. One of the contending balloons was compelled to retreat, and both balloons happily outlined the sham battle, which was remarkable chiefly for this latter denouement.

Congress is to have another prince as delegate from Hawaii, but neither he nor his country can be superstitious, for his name is Jonah. It does not follow, however, that his entrance into our national deliberations will be followed by a wall.

A physician says that going on the stage is a sure cure for the blues. Somebody ought to protest against this prescribing for the individual at the expense of the public.

There has been a gain of \$114,000 in the value of imports during the past eleven months, not including the diamonds and things that were missed by the inspectors at New York.

In Russia it is against the law to marry more than five times. Even in Russia we can't see why such a law should be necessary.

In London they say that a man should allow his wife one-fifth of his income. Here she gets five-fifths.

Ostrich Feathers

There seems to be something irresistibly attractive to women in the fluffy, nodding plumes of the ostrich, and if this great bird could not be bred on ostrich farms his race would become extinct. Like many another wearer of fine plumage, the goddess of fashion would pursue him to the death.

Although good ostrich plumes are as costly as ever, they are in wider demand than in all the history of millinery. Everyone wants plumes, and other ostrich feathers, in all the varied beautiful mountings which the artists make them up.

There is a wonderful variety to choose from. The introduction of "willow" plumes, that is those having the plumes lengthened by tying on extra pieces, has brought out all sorts of color combinations and plumes of long sweeping fibers. They are very beautiful but not as practical as the unplied plumes. In buying high priced ostrich feathers the French plumes with long, slightly curled plumes are by far the best investment. They

can be cleaned and recurred at a comparatively small outlay and may be bought on a guarantee from the dealer that they will stand wear. Moisture doesn't do them any permanent harm. On the other hand the willow plume cannot be guaranteed to wear. Those in black are especially fragile, something in the dye causes them to come untied or to break off when the air is damp. The white and light colors wear better than black.

When one does not need to think of economy there are beautiful effects to be wrought out by using plumes with plied plumes, which are well worth the price.

Three fall hats are illustrated here showing the simplicity and richness of ostrich used for trimming. They are mounted in groups of three or more toward the back of the hat as a rule. Nothing else is needed on the shape and the addition of a band and bow about the crown is a matter of choice, for a shape bearing a full tuft of plumes is amply trimmed.

JULIA BOTTOMLEY.

NEW TOUCH IN JEWELRY

Quaint Idea That Has Only Recently Made Its Appearance, and Is Welcomed.

Jewelry, at any rate, in our loose acceptance of the term, for no stones are visible in this pretty fancy. I have spoken of the gold lace pins crocheted with lace. Now far-seeing manufacturers have brought out wooden ornaments in all manner of sorts and shapes—collar pins, hat pins, belt buckles, cuff links, slipper buckles—all to be covered with this crocheted lace. One may have a whole set of them for an afternoon's work, and they make the daintiest of gifts for brides and "next Christmases."

If crocheting is not in your line, fine lace can be darned around these wooden foundations, of dotted or figured net may be used instead. Whatever material is used, they are as quaint and pretty as the lace-covered gold pins, which is saying a great deal.

CHIC TUSSOR FROCK

This illustration shows a simple but good looking frock for a young girl made from tussor silk and trimmed with spotted satin foulard and Gulguru collar. The belt of suede matches the ground of trimming.

PRETTY FANCY OF FASHION

Jeweled Laces Are Marvelously Beautiful, Though Only for Those With Long Purse.

The very newest thing in jewelry is the reproduction of old and priceless laces in tiny pearls and diamonds mounted upon gunmetal, platinum or diamond net. The exact pattern of the lace is copied, and the whole is formed into a jabot or a lace fall for the collar. Sometimes there is a bow above, composed of some colored stones—emeralds or amethysts or rubies—set in solid.

Tubs new and wonderful work has revolutionized the art of the jeweler, since the workmanship has become quite as valuable as the stones themselves. These laces of jewels are, of course, ruinously expensive, but they are such marvels of beauty that a woman might well dispense with all other ornament for the sake of possessing one of them.

The Swan-Like Throat.

This is to be a great season for collarless frocks.

But one pretty neck is often harder to acquire than the dozens of chemistries we may have done away with.

A good neck depends much upon the general health, but considerable may be done that is of direct benefit.

Many an otherwise lovely neck is ruined by an awkward poise of the head. The best cure for this is to sit or walk each day with book on the head. Do not stiffen the muscles to hold this weight. Manage it by balancing.

Thickness of the neck should be an easy fault to overcome.

Plenty of sleep and an abundance of milk, with raw eggs beaten up in it, should help considerably.

The neck should be washed well every night with warm water, followed by a cold spray and massaged afterward with a cold cream.

Low-Cut Neck Edging.

A ready-made dress of dark blue lawn seen recently had at the round Dutch neck a tiny piping formed from the edge of a fine hemstitched handkerchief. The effect was cool and dainty, "and the handkerchief had paint on it, anyway," said the bright originator.

Bracelets Over Gloves.

Few women seem to realize that bracelets over gloves are almost as bad as rings over gloves. If one wears a bracelet with long gloves at all, it should be worn under them; but, if possible, it should not be worn.

Silas Carter's Romance

By Carl Jenkins

Copyright, 1910, by Associated Literary Press

There was nothing wrong about Silas Carter. He was a strapping young man who worked in a sawmill and ate three square meals a day. When evening came he sat down to store his mind with knowledge. He couldn't borrow Shakespeare or American history and, in consequence he borrowed romances. They were not exactly dime novels. They related mostly to knights and chevaliers and rescues of distressed damsels.

After reading for two or three years Silas got the idea that he was a chevalier, and that the distressed damsel would sooner or later heave into view. He didn't say anything about it. It might be that he wasn't a chevalier, and it might be that the distressed damsel would be detained on the road.

One night when he was calling on Miss Eunice Beebe, the daughter of a villager, he casually observed:

"Eunice, I love you and want you to be my wife."

"I will," she replied.

Eunice had known Silas for a long time, and had come to realize that she loved him, and why shouldn't she have answered that way? Why blush and stick a finger in her mouth and reply that she would see her father about it? She did just as a plain, sensible girl always does under the circumstances—she waited for Silas to say more.

He began and ended right there. If the distressed damsel appeared he would tell Eunice that he had changed his mind; if she didn't then they would get married some day. Eunice continued to be a good, plain girl, and Silas kept his eyes open for what was coming.

It came one July day. A young lady from the city, stopping at a summer hotel in the village, came down to the mill pond to fish. Silas was in the mill yard, wrestling the saw-

ing for two weeks he wrote to her. He wrote that he took his pen in hand to hope that she was well, and that his own health was never better. He wrote that the sawmill business was good, and that he expected to have his wages raised to \$22 a month. He thought of her often, he said. In fact, he had driven a stake at the spot where she had fallen in, and went there to look at it five or six times a day. Then he copied a verse of poetry and ended the letter by saying that he hoped for an answer by return mail.

He didn't receive one, however. Two weeks dragged along, and then one night as he was calling on Eunice he said:

"Eunice, about our getting married."

"Yes, Silas."

"I think we'd better."

"Very well."

She waited for him to ask her to name the day, but he had nothing further to say on the subject. A bright idea had occurred to him. He had written "in haste" on the envelope of his letter, but by so doing he may have made the postmaster mad and the epistle had been torn up. He decided to write again.

He took his pen in hand with firmer grip this time, as his wages had been raised to \$22 per month. He hoped for an answer within three days, but at the end of a fortnight none had come. One mail a day reached the village post office, but he inquired five times a day, so as to make sure of missing nothing. After two weeks and no letter.

Was Chevalier Silas in love with the damsel he had rescued? He was. He didn't kick around nights and dream of her, but he loved her gallantly—chivalrously, —knightly—the same as the heroes of his romances had loved. Perhaps the reason she hadn't answered was that she was coyly waiting for him to come to the city and tell of his adoration. Her mother might have tied her up in the garret or her father thrust her into a dungeon deep because she had told of her love for him. For three days Silas debated as to what the Chevalier St. Aubyn would have done under like circumstances, and then he left for the city.

Having the damsel's address, it was easy to find her father's house. He found it early in the morning. Just as the father was emerging with a very strong cigar in his mouth. He gave Silas a look over, uttered a "umph!" to himself, and then asked: "Well, what is it?"

"Your—your daughter was up at Bellville in July," stammered the young man.

"Well, what of it?"

"She tumbled into the mill pond."

"And got wet. Well, what of that?"

"I—I work in the sawmill there."

"I thought so. Go on."

"I pulled her out of the pond."

"Oh, you did? Did it strain your back any?"

"No, sir."

"If it did, try a porous plaster."

"But I saved her life, sir," continued Silas, "and she said she'd never forget it."

"And I don't think she will. She lost her false hair and complexion, I believe."

"And she asked me to call on her if I was ever in town."

"And being as you are in town, you have come to call. Well, you can go in and interview the cook if you wish. My daughter has been married six weeks and is still away on a bridal tramp. She never mentioned anything about you, but if you really saved her life, why, have a cigar with me."

Silas reached home that night at 11 o'clock. His jaw was set and his look was determined. The villagers had long since gone to bed, but that was naught to him. He walked to the house of Eunice's father and around to her window, and, in response to his calls, her head was poked out and a voice exclaimed:

"Silas Carter called. He was brazen up by the heroic deed he had done, and he felt very important when he found himself in the presence of a young lady wearing diamonds and fine clothes, and almost smiling at the fresh grease on his boots. He didn't know exactly what to do with his hat, hands and feet, but he stowed them away somewhere and modestly said that he stood ready to rescue a damsel every day in the week."

He was thanked and thanked, and the damsel said she could never forget him. She even went so far as to give him her address in the city and say that she would be pleased to hear from her hero—occasionally. In getting off the hotel veranda Silas fell over a widow's poodle dog and rolled down the steps, but he was none the less a hero in his own eyes for this. He had read that they occasionally took a tumble and were none the worse for it. That evening when he went over to see Eunice he said:

"Euny, I asked you a few nights ago to marry me, didn't I?"

"Yes."

"Well, we'll hold on awhile about it, I guess."

"Very well, Silas," replied the dutiful Eunice.

She might have become angry and jumped up and down and threatened a breach of promise suit, but she didn't. She had heard about the rescue, and she had an idea it was that, but she did not lose her temper. She just moved the pitcher along and said:

"Silas, have another glass of hard cider before you go. It's good to keep off the nightmare."

Silas, didn't see the damsel again before she left for home. After walt-

MUNYON'S PAW-PAW LIVER PILLS

I want any person who suffers with biliousness, constipation, indigestion or any liver or blood ailment to try my Paw-Paw Liver Pill. I guarantee them purity in the blood and put the liver and stomach in a healthy condition and constipation, or I will refund your money. — Munyon's Homeopathic Home Remedy Co., 63rd and Jefferson Sts., Phila., Pa.

KAISER ENTERTAINS AMERICANS ON HIS YACHT

PARTY ON THE HOHENZOLLERN

It is said that Americans are not especially in favor with the new king of England, but the emperor of Germany still counts many of them among his personal friends, and often entertains them on board the Imperial yacht Hohenzollern. The illustration accompanying is from a photograph of one of these yachting parties, the lady at the kaiser's immediate right being Mrs. Goelet of New York.

CITY'S NEW TIPPLE

Buttermilk Adopted by Chicagoans as Best Hot Weather Drink.

It is Chasing Mint Julep From Bar and Has Relegated Sundae to Rear of Drug Stores—Dealers Busy.

Chicago.—Buttermilk—the drink that is making Chicago famous. If you don't live strictly on a buttermilk diet during the hot weather you don't belong, and dairymen, doctors, drugstore keepers, club men, caterers and restaurateurs have as much as agreed upon it.

According to people who devote much of their time to the laudable labor of selling thirst quenching beverages, buttermilk has for the last five years steadily increased in popularity as a hot-weather drink, until today it is the most sought after of all, having surpassed such rivals as the once-favored ice-cream soda, the mint smash or the entrancing julep.

When the thermometer bores between 85 and 95, buttermilk becomes the cup that cheers and never irritates, no matter how plenteously imbibed. Drink experts say so. They say that this once more or less despised liquid is now called for more frequently than any other in country clubs, in drug stores, in hotels, in restaurants and in buffets.

It is served in the country clubs in

MAKES BRIDLE TO BUY BOOKS

Montana Prisoner Serving Long Term Is Eager to Spend Idle Time Profitably.

Douglass, Ariz.—C. C. Allen does not claim to be a master of the lyre, but the Douglass Chamber of Commerce and Mines has just received an appealing letter from him which shows that while he does not hope to get out of the state prison at Deer Lodge, Montana, yet he has employed his one shining talent well in hope of using his time behind the bars so well that when he gains his freedom he will lead a better life. Here is the letter, which explains itself:

"You may be surprised to receive this letter, as I am an inmate of Montana state prison. I am serving quite a long term here, and wish to put in part of my time studying. Having this in view, I have spent several months in tedious work upon a fancy horse hair bridle, in the hope that I should be able to raise enough money out of its disposal to purchase the books that I am in need of."

"It is in regard to this bridle that I take the liberty of addressing you, asking if you will take an interest in disposing of it for me. The bridle is made of thousands of strands of varied colored horse-hair, and it will be found useful and strong as well as a work of art. C. C. Allen, Box 7, Deer Lodge, Montana."

Allen probably sent his letter to Douglass in the hope that some cowpuncher or Mexican Vaquero, who delights in gay saddles and ornamental bridles and horse trappings, might offer a field for purchase.

Badgers as Woman's Pets.

Spokane, Wash.—A bad has been inaugurated by young women of Othello, Wash., which threatens to cause a rise in the badger market.

The bad is domesticating badgers as pets, and already several of these animals are enduring captivity. It is not an unusual sight to meet a badger in the street of Othello on an afternoon, in tow of its fair mistress.

The animals seem to take kindly to their new sphere and submit peacefully to the fondling of admirers.

Troops Will Fight Fires.

Washington.—President Taft has authorized the use of troops to fight forest fires in Montana, Idaho, Washington, Oregon and California.

"Americans need the help of the

PROTECT THE BIRDS.

International Movement Submitted to Our Government.

Fourteen of World Powers Be Arrayed Against Butchery of Feathered Tribe of Globe for Millinery Ornamentation.

New York.—To array 14 of the world powers against the butchery of the birds of the globe for millinery ornamentation is the object of an international movement which has been formally called to the attention of the United States government from this city. Recommendations for the prohibition of this feather traffic by non-export and non-import laws in Great Britain, Germany, France, Italy, Russia, Norway, Sweden, Belgium, Denmark, Holland, Hungary, Austria, Bavaria and this country have just been filed with Secretary of State Knox at Washington by William Dutcher, president of the National Association of Audubon Societies, who represented the United States at the recent International Ornithological congress in Berlin, where they were framed and unanimously endorsed by delegates from every part of the world.

BEETLE KILLING ELM TREES

Expert Who Examined Roosevelt's Chestnuts Reports Other Ravages in Four States.

New York.—A great plague of elm leaf beetles has swept over this section of the country this summer, according to Director Murrill of the Bronx botanical gardens. Mr. Murrill recently made a trip of investigation through four states and says that he found the condition of the elm trees alarming everywhere.

The beetle, however, is not the only enemy to the trees which is working. Mr. Murrill was called to Sagamore Hill, where he made an examination of the chestnut trees, which are Colonel Roosevelt's pride. When Colonel Roosevelt returned from Africa he sent word to the Bronx botanical gardens that something was wrong with his trees, and asked that an expert be sent to inspect them.

Mr. Murrill discovered that almost every tree on the colonel's estate was dead. The canker, a rapid-growing fungus, had started beneath the bark of the trees, and after killing the trees had spread quickly all over them. It traveled with surprising swiftness, and within two months caused thousands of dollars worth of damage.

FRUITS AND NUTS

DOMESTIC PRODUCTION SUPPLYING IMPORTED VARIETY.

Several Lines That Were Once Almost Wholly Brought From Abroad Are Now Largely Produced in This Country.

Fruits and nuts valued at \$458,000,000 have passed through ports of the United States during the last ten years. Of this amount, \$285,000,000 represents the value of imports from foreign countries, \$156,000,000 exports to foreign countries, \$12,000,000 receipts from non-contiguous territories of the United States, and \$5,000,000 shipments to those territories.

The value of fruits and nuts imported into and exported from the country in the fiscal year which ended June 30, 1910, was in round terms \$55,000,000, of which about one-third represented exports. A compilation made by the bureau of statistics of the department of commerce and labor gives the year's imports of fruits and nuts at \$36,000,000 and exports at \$19,000,000.

A study of the commercial movements during the last decade or two develops the fact that domestic production is rapidly supplanting certain classes of fruits formerly imported in large quantities. This applies especially to raisins, prunes and oranges. Certain other lines, in which local production is still insufficient to meet home consumption, continue to increase in value of imports, notably hennans, figs, walnuts, cocoanuts and almonds. Comparing the imports of the year just ended with those of one and two decades ago, imports of fruits and nuts as a whole have increased from \$21,000,000 in 1890 and \$19,000,000 in 1900 to about \$36,000,000 in 1910.

On the export side a far more rapid growth has occurred since 1890. In that year the total value of all fruits and nuts exported from the country was but \$4,000,000. In 1900 the total had increased to nearly \$12,000,000, and in 1910, about \$19,000,000. The principal articles contributing to this growth are apples, prunes, oranges, raisins, apricots, canned fruits and nuts.

Of foreign fruits consumed in the United States, bananas supply about one-third. The imported bananas come chiefly from Costa Rica, Honduras and Panama in Central America, the British West Indies and Cuba. Italy supplies practically all the lemons imported into the country. Of course, the Xantho variety, produced in Greece, supplies most of the imports. Raisins, formerly coming in at the rate of \$2,000,000 per annum, chiefly from Spain and Turkey in Asia, have practically disappeared as an article of importation, and as above indicated, are now becoming an important article of export.

"Dry" For All Time.

Fresno, Cal.—Dry in perpetuity is the restriction placed by the Santa Fe railroad in all deeds to property in the new town of River Bank, which is to be a midvalley division point on that line. District Agent Hobart says it is the first town laid out by a railroad to exclude saloons for all time.

"Dry" For All Time.

Fresno, Cal.—Dry in perpetuity is the restriction placed by the Santa Fe railroad in all deeds to property in the new town of River Bank, which is to be a midvalley division point on that line. District Agent Hobart says it is the first town laid out by a railroad to exclude saloons for all time.

DEPENDS ON TEST OF THE GUN

Army Will Adopt Sixteen-Inch If Navy Finds It Can Use the Fourteen.

Sixteen-inch guns for the army will follow a successful test of 14-inch guns for the navy, according to Brig. Gen. William Crozier, chief of ordnance. The decision will hinge on the trials of the new navy rifles. "We still have an advantage over the navy," said General Crozier. "We can build guns more powerful than the toughest armor they can produce. The navy is pretty close to the limit of armor protection, and we have by no means built the most powerful guns of which we are capable. The navy is now proposing to arm its new battleships with 14-inch guns. Those rifles will be of higher power than the army 14-inch guns and consequently more powerful. If the navy adopts 14-inch guns as a permanent feature, we shall have to meet this advance in the fighting strength of warships. We shall then increase the power of our gun."

It was only a short time ago that the army adopted the 14-inch rifle. One of the new type has been completed and tested. Twelve others are now in the process of construction. It seems probable that an entirely new type will be adopted even before the batch of 14-inch guns has been completed.

OUR CIGARETTES IN CHINA

Consul General Charles Denby Says America Has Taught the Chinese to Smoke Them.

America has taught the people of the Chinese empire to smoke cigarettes. In a report to this government on foreign trade by Consul General Charles Denby of Vienna in which he described the class of foreign markets which may be created by American enterprise and then supplied, the consul general says:

"One of the most conspicuous examples of such market is the demand for the cigarette in China. Ten years ago the cigarette was an article used in China by a small number of people, chiefly foreigners. The field attracted the attention of a group of American manufacturers who examined into it and decided to introduce the cigarette to the Chinese people by American methods. The result is that now the cigarette is popular throughout the empire."

NO POLO PONIES FOR CADETS

Washington Officials Won't Pay Cost of the Game at West Point—Major Out \$1,975.

Maj. J. M. Carson, Jr., quartermaster in the United States army, would be glad to dispose of \$1,795 worth of polo ponies. The ponies have been used by the West Point cadets in playing the game.

Maj. Carson, who has a kind heart but is not versed in the law, paid the \$1,975 for the ponies in April, 1909. Then he presented the bill in the regular way with his other accounts to the war department. The auditor or the war department squinted at the item and finally refused to reimburse the major.

By this time the major was getting a little anxious and appealed to the comptroller of the currency to reverse the auditor's decision. The comptroller of the currency seems to be as hard hearted as the auditor of the war department, for he has just handed down a decision leaving the major with his batch of polo ponies on his hands and no money to reimburse him.

The comptroller says that the application for "horses, cavalry, artillery and engineers," under which the major thought he was authorized to buy the polo ponies, is not properly chargeable with such expenditure. The comptroller adds that he does not know of any other appropriation to which the amount can be charged.

The action of the comptroller will be almost as sad a blow to the cadets as it is to Maj. Carson, for it will mean that they will have to give up polo unless they play with cavalry horses or mules. It looks as if the major would have to give up about \$1,975 until he can dispose of the ponies.

COTTON LEADS OUR EXPORTS

Shipments of Natural Products Fall Off, While Manufactures Set New High Record.

Cotton, copper, illuminating oil, when—these articles, in the order named, formed the most important articles exported from the United States during the fiscal year just closed. The value of the cotton exported was \$150,000,000; of the copper, \$82,500,000; of the illuminating oil, \$62,500,000; and of the wheat, \$47,000,000.

Other articles of export ranked in value as follows: Flour, lard, tobacco, lumber, upper leather, corn, bituminous coal and lubricating oil.

In nearly all the articles of natural production there was a marked decline in the exports of 1910, as compared with previous years, while in certain manufactures the figures for the year are larger than for any previous year, and the total for all manufacturers probably will exceed that of any earlier year. The bureau of statistics, which has given out these figures, has not yet completed the total value of the manufactures exported.

The falling off is most marked in corn, wheat, flour and meats, wheat falling from \$161,000,000 in 1892, the high year, to \$17,000,000 in 1910; corn from \$55,000,000 in 1900 to \$25,500,000 in 1910; flour from \$75,000,000 in 1893 to \$46,500,000 in 1910; lard from \$60,000,000 in 1906 to \$43,000,000 in 1910; bacon from \$46,000,000 in 1895 to \$18,500,000 in 1910; fresh beef from \$32,000,000 in 1910 to \$7,750,000 in 1910; and cattle from \$42,000,000 in 1904 to \$12,000,000 last year.

PANAMA DIRT FLYING FAST

Records Broken in an Unusually Rainy Month—Government Activity Extends Also to Sanitation.

Notwithstanding that the precipitation during the rainy month of June, 1910, in Panama was almost double that in the same month of 1909 and 1908, the work of excavation in the canal last June exceeded by 200,000 cubic yards the exactions in the corresponding period of the previous year.

This fact was made known in a report to the war department on the progress of the canal operations. As an indication of the great strides being made in the work, the report showed that in June, 1904, the excavation amounted to 32,551 cubic yards, as compared to 1,305,141 cubic yards taken last month.

Uncle Sam's physicians and sanitation experts who are responsible for the health of the men on the Panama canal job are taking no chances of infection. They have eliminated mosquitoes and a crusade on the house fly has been started.

The measures taken to exterminate the pest go so far as providing a law which requires street vendors of confectionery, fruits, pastry or anything else which may draw flies to keep their wares covered with wire screens.

American Trade With Territories.

Trade of the United States with its non-contiguous territories for the fiscal year just ended aggregated about \$190,000,000, according to statistics of the department of commerce and labor. The department contrasts this with the record of 1897, when the trade with non-contiguous territories aggregated only \$35,000,000. The largest percentage of gain during the past year was in the Philippines, to which the recent tariff act extended the privilege of interchange of merchandise free of duty. Imports from the Philippines in the 11 months ending with May, 1910, were valued at \$15,887,418 and exports at \$15,140,445.

Dilly—My salary is knocked into

ADOLESCENCE IN EDUCATION.

There has been a spirit of unrest, in regard to matters of education, from the very beginning of our public school system. This spirit of unrest has been the result of our inadequate educational system, in as much as it does not furnish such mental development as can be practiced in rural life. This unrest is still in operation: trying to develop the schools into institutions that will more fully meet the needs of the mass instead of a few. For a long time it was secondary schools that received the attention of the educators, but now attention has shifted to the elementary schools as well. This spirit of unrest spread from Germany to England thence to America, where such men as Dr. Wm. T. Harris, Col. Francis W. Parker, Pres. Chas. W. Eliot, Dr. G. Stanley Hall and a number of others were eager to grasp the "New Learning," as it were and demand something in our schools that shall be real and vital rather than artificial or indifferent.

There is a generally agreement as to the most important fundamental principles underlying our educational structure. It is only when we as individuals put the principles into practice that a serious inadequacy is discovered. The purpose of the school has been clearly stated and almost universally accepted. In actual practice the work has not competed with the stated purpose of the school. It seemingly has not recognized the fact that its present stated development does not meet the requirements in further citizenship.

As our schools do not meet the demands of the mass, for rural citizenship, they find instead, work better suited and practically fail to enter a higher mental development in the secondary schools, with the proper adjustment of elementary courses a great mass of the boys and girls who leave before high school age, would enter high school and be much better prepared to meet the strenuous problems with which they are sure to come in contact. To reach the great mass of pupils, or rather to keep them in school, is the great problem that we are now facing. To solve this problem consists in placing of such subjects in the curriculum, as will give the pupil such information as can be put into practice. By this I do not mean to augment the curriculum, but to eliminate such that is not practicable and insert practicable ones.

I wish to repeat that it would be inexpedient to add anything to our over full curriculum, without some elimination. Better to relax the impractical subjects. I believe in a filtering out of subjects so that we may teach the essentials for better. Introduce such subjects as agriculture, Industrial Arts, etc.

Again our schools have been, for the most part, inadequate, from the fact that the minor schools have been depending on or arranging their course of study to suit or to meet the needs of the larger schools, rather than for the good of their own environment. They, perhaps, have been dominated by their obligations to the larger ones, in as much as the students could not enter the secondary schools unless they had done a certain kind and prescribed course of study. By this means the development of the smaller schools was prevented.

A great part of the arithmetic that is now taught in the school would naturally come to the student without the aid of teacher or school, if we would only be patient. (See Spencer on education.) As a rule too many things are taught to the boy while in school, that will never be of use to him, elsewhere. It has also been stated that adjustment is needed in language as well as arithmetic.

One of the chief functions of the elementary school is to give the child a desire for reading and an appreciation of good literature. To train in the use of simple and correct language is indeed a necessity. But above all else, the boy or man who is not a lover of good books, who does not put himself in touch with the best literature, and who does not draw inspiration, enthusiasm and power, has been robbed of the best that the school can give.

That these may be wrought out to fulfill the law of individual activity, and to have their effect in making or marring human happiness, there must be expression. We cannot know what a man's thoughts are, or his ideals or his character, except as these are made known to us through his words and acts. His true thought, his real character, may not be expressed always, but something that has been thought and felt in him shows forth in expression.

F. D. STONE.

COMMISSIONER'S SALE.

J. A. GRAVES Plaintiff
vs
VIRGINIA GRAVES & etc
Defendant.

By virtue of a judgment of the Crittenden Circuit Court rendered at its June term 1910, in the above style cause, I will on the 12th day of September 1910 at 1 o'clock at the door of the Court House in Marion, Kentucky, sell the following described tract of land lying in Crittenden County, Kentucky, on the waters of the Cumberland river, and being the same land conveyed to J. A. Graves and George Graves by their father Dr. W. S. Graves and containing one hundred and thirty acres more or less. Said land will be sold on six months time. Purchaser must be prepared to give bond with approved personal security. A lien retained upon the land to secure the purchase price.

J. G. ROCHESTER
Commissioner.

WHY BE BALD
When Parisian Sage is Guaranteed to Stop Falling Hair, or Money Back?

Parisian Sage is the most delightful hair dressing in the world; it is pleasant, invigorating and refreshing. It makes the hair soft, beautiful and luxuriant. Wherever Parisian Sage is known, it is the ladies' favorite hair dressing.

If, after using one bottle, you do not say it is the most delightful hair dressing you ever used, you can have your money back. The price is only 50 cents a large bottle at Haynes & Taylor. It is guaranteed to cure dandruff and falling hair, or money back. The girl with the Auburn hair is on every bottle.

"We pay cash for Sorghum; we eliminate the commission-man's profit, and we buy your crop just as it runs regardless of the amount. We furnish coverage, make you prices at the nearest railroad station, and keep you posted on the market. Get in communication with us.

TORRITT & CASTLEMAN,
129 N. Second St.,
Louisville, Ky."

AN AWFUL RECORD.
Every year thousand of men and women die of kidney disease who might have been cured if its presence had been discovered in time and a prompt treatment with Kidnets adopted. If you have backache, kidney trouble or other symptoms of kidney disease, begin using Kidnets immediately. Drugists and dealers sell it for 50 cents.

STRAYED—From my farm on Marion and Crayne road, about six months ago, a black poland-china, weighing about 100 pounds. Any information will be rewarded. J. H. Agee, Marion, Ky., Route 2.

BLACKFORD.

On our visit to Blackford on Friday of last week, we found the good town enjoying its share of peace and prosperity.

We visited as many of the stores as the limited time between trains would allow, receiving good reports from all of them.

We interviewed the farmers who were in town who gave a glowing account of the bright future for a good crop over which everybody is in good spirits. The wheat crop is already made and best in many years while the tobacco and corn crop barring accidents is far above an average. Several new buildings are going up in the town, among them a nice new home near the depot for Dr. Reynolds with others in contemplation.

McNeeley & Chandler have a fine hardware and furniture stock and are enjoying a nice trade.

Friend Edwin Walker is as big and fine looking as ever and enjoying a good trade.

Carnahan Bros. are in full blast in the Dry Goods line and reaping the reward that comes to those who look out for the best interest of their customers.

McConnell Bros. while we were there seemed doing well in the grocery business.

The Brown Drug Company have a nice neat store, well kept and well supplied. Mr. Brown is in Dawson enjoying a much needed rest.

J. C. Vaughan & Bro., formerly of Golds Store, have bought the building lately owned by J. F. Canada, now at Crayne, and are stocking up with a big, fresh line of Dry Goods, Clothing, shoes, notions and a first class line of new groceries. They handle everything in either line the farmer needs, and take all the produce of the farmer at the highest market price. They have a nice store and a well selected stock and from appearance are going to merit a big trade.

Our good friend Geo. Nunn, Cashier of the Blackford Bank, reports business in his line good and a bright future before them.

We did not find time to visit the two nice Barber shops and the various other businesses while there.

The clever and popular I. C. Agent, Charlie McGregor is kept busy even with all the assistants he has, in handling the main line business with that of the Dixon and Providence branch that is said to be the best paying number of miles of the I. C. system.

Blackford with her mills, churches is destined to make more rapid strides in the next few years than ever before in her history.

Mens shirts 39c. Saturday.

WOMEN'S HAIR

Can Easily be Made Fascinating and Luxuriant

On April 2, 1910, Mrs. R. M. Warden, 5 St. James Ave., Holyoke, Mass., wrote: "Parisian Sage is the best hair dressing I ever used. It gave my hair life and gloss which no other dressing ever did, besides stopping it from falling out. It is the only dressing for up-to-date women."

Parisian Sage is guaranteed by Hayner & Taylor to cure dandruff, stop falling and itching scalp in two weeks, or money back. It makes hair grow lustrous and luxuriant. It is a delightfully refreshing hair dressing, not sticky or greasy and will immediately banish all odors. Large bottle 50 cents at druggists everywhere, and at Haynes & Taylor. The girl with the Auburn hair is on every bottle.

For Fine Breeding.

I will stand my black male Pole at my farm near Marion at \$1.00. Those desiring to improve their stock had better see me. I. L. BRADBURN, 1m Marion, Ky., Route 5.

CHANGE IN BUSINESS FIRM

H. V. Stone Sells Big Dry Goods
Business to McConnell and
Nunn First of the week.

Mr. Henry V. Stone, one of the best known and most successful merchants of Marion sold his large business to Tom McConnell and Maurice Nunn, who will run the business under the firm name of McConnell & Nunn.

The members of the new firm are well known citizens of Marion, Mr. McConnell having at one time been a partner of Mr. Stone and so popular and well known that it is useless for us to attempt to rate him higher than the esteem in which he is already held by his thousands of friends in this and adjoining counties.

Mr. Nunn, the junior member is a young man of unquestioned ability for some time past with the big firm of Stinson Bros., of Evansville, Ind.

They are both clever, courteous, business men, composing a firm that will win for them a rich share of the large trade coming to Marion.

FOR SALE.

A farm of 60 acres, all well improved, 20 acres in creek bottom, eight miles from Marion, on Marion and Clementsburg road on the waters of Crooked Creek. Dwelling and all necessary out buildings, good well and cistern. This farm is a bargain Address T. E. BEARD, Route 4. Marion, Ky.

DON'T BREAK DOWN.

Severe strains on the vital organs, like strains on machinery, cause break down. You can't overtax stomach, liver, kidney, bowels or nerves without serious danger to yourself. If you are weak or run down, or under strain of any kind, take Electric Bitters, the matchless tonic medicine. Mrs. J. E. Van de Sande, of Kirkland, Ill., writes: "That I did not break down, while enduring a most severe strain for three months, is due wholly to Electric Bitters." Use them and enjoy health and strength. Satisfaction positively guaranteed. 50 cents a bottle at J. H. Orme's and Haynes & Taylor's.

The Lash of a Fiend would have been about as welcome to A. Cooper, of Oswego, N. Y., as a merciless lung-racking cough that defied all remedies for years. "It was most troublesome at night," he writes, "nothing helped me until I used Dr. King's New Discovery which cured me completely. I never cough at night now." Millions know its matchless merit for stubborn colds, obstinate coughs, sore lungs, lagrippe, asthma, hemorrhage, croup, whooping cough or hayfever. It relieves quickly and never fails to satisfy. A trial convinces. 50c and \$1. Trial bottle free. It is positively guaranteed by J. H. Orme and Haynes & Taylor.

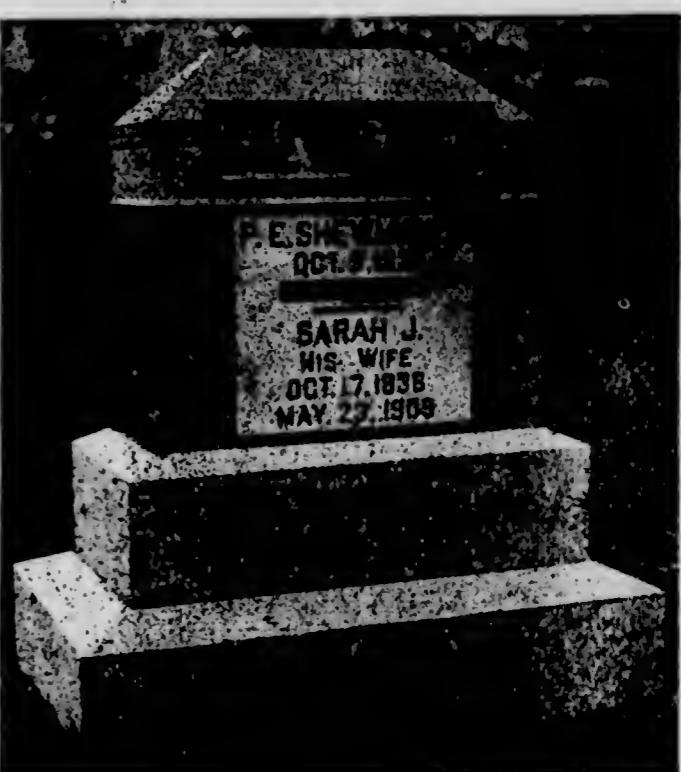

A FINE MULE.

Mr. J. A. Pickens of near Tribune, drove his two fine mares in town Saturday with a fine mule four months old and measuring 54 inches high, following one and a fine colt following the other. The mule is one of the finest in every way we ever saw and Mr. Pickens says he will take one hundred dollars for it or give the same for one that will match it.

SLEEPLESS NIGHTS.

Many a night's rest is spoiled by frequent fits of coughing—sometimes by a mere tickling in the throat that is so annoying as to prevent sleep. Kemp's Balsam will cure cough if any medicine will and will relieve the irritation in the throat. For all throat and lung troubles take Balsam. Druggists sell it 25c. and 50c. a bottle.

Rev. W. C. Pierce will preach at the Baptist church Sunday 11 a. m. and 7:30 p. m. Be sure and hear him.

Prospective Buyer—Why do you say Henry & Henry's is the best place for me to buy a monument?

Our Customer—Because their work is in a class by itself. You can tell their work as far as you see it.

P. B.—In what way? What do you mean?

O. C.—On account of the lettering and the artistic way they arrange the lettering. A good monument can be spoiled by a poorly arranged inscription; look at Henry & Henry's work the next time you visit the cemetery; then look at the others; you can see the difference.

P. B.—I never thought of that, I'll look.

Notice the Lettering on the Monument Above.
